

What map would I use if...

...I wanted to find the most densely populated area in a particular area?

Physical Features Climate Zones Vegetation Zones
Population Density Economic Activity

What map would I use if ...

...I wanted to find which natural resources are most abundant in a particular area?

Physical Features Climate Zones Vegetation Zones
Population Density Economic Activity

What map would I use if...

...I wanted to find what type of land use occurs in a particular area?

Physical Features Climate Zones Vegetation Zones
Population Density Economic Activity

What map would I use if...

...I wanted to find which lakes together make up the largest body of fresh water in a particular area?

Physical Features Climate Zones Vegetation Zones
Population Density Economic Activity

What map would I use if...

...I wanted to find which areas are covered mainly by forests?

Physical Features Climate Zones Vegetation Zones
Population Density Economic Activity

What map would I use if...

...I wanted to find which state has a particular climate?

Physical Features Climate Zones Vegetation Zones
Population Density Economic Activity

What map would I use if ...

...I wanted to find the most common type of vegetation in a particular area?

Physical Features Climate Zones Vegetation Zones
Population Density Economic Activity

What map would I use if...

...I wanted to find an area that ranges between 2 – 250 people per square mile?

Physical Features Climate Zones Vegetation Zones
Population Density Economic Activity

What map would I use if...

...I wanted to find which states run through a particular mountain range?

Physical Features Climate Zones Vegetation Zones
Population Density Economic Activity

What map would I use if...

...I wanted to compare how plant life differs between two areas?

Physical Features Climate Zones Vegetation Zones
Population Density Economic Activity

What map would I use if...

...I wanted to compare the weather of two different areas?

Physical Features Climate Zones Vegetation Zones
Population Density Economic Activity

What map would I use if...

...I wanted to find the coldest area in a particular country?

Physical Features Climate Zones Vegetation Zones
Population Density Economic Activity

What map would I use if ...

...I wanted to find which resources are most abundant in a particular area?

Physical Features Climate Zones Vegetation Zones
Population Density Economic Activity

What map would I use if...

...I wanted to find a place to live that was not overcrowded?

Physical Features Climate Zones Vegetation Zones
Population Density Economic Activity

What map(s) would I use if...

...I wanted to find make a prediction about why people live where they do?

Physical Features Climate Zones Vegetation Zones
Population Density Economic Activity

What map would I use if...

...I wanted to find the highest elevation in a particular area?

Physical Features Climate Zones Vegetation Zones
Population Density Economic Activity

What map would I use if...

...I wanted to predict what jobs might be available in particular areas?

Physical Features Climate Zones Vegetation Zones
Population Density Economic Activity

What map would I use if ...

...I wanted to find the most common type of vegetation in a particular area?

Physical Features Climate Zones Vegetation Zones
Population Density Economic Activity

What map would I use if...

...I wanted to find an area where mostly mosses, grasses, and low shrubs grow.

Physical Features Climate Zones Vegetation Zones
Population Density Economic Activity

What map(s) would I use if...

...I wanted to see how vegetation changes with climate?

Physical Features Climate Zones Vegetation Zones
Population Density Economic Activity

What map would I use if...

...I wanted to find clusters of resources available in a particular area.

Physical Features Climate Zones Vegetation Zones
Population Density Economic Activity

What map would I use if...

...I might find the most gold in an area.

Physical Features Climate Zones Vegetation Zones
Population Density Economic Activity

What map would I use if...

...I wanted to build a house in a usually sunny, warm location.

Physical Features Climate Zones Vegetation Zones
Population Density Economic Activity

What map would I use if...

...I wanted to find an area that has less than 2 people per square mile.

Physical Features Climate Zones Vegetation Zones
Population Density Economic Activity

What map would I use if...

...I wanted to build a mountain cabin on land higher than 7000 feet above sea level.

Physical Features Climate Zones Vegetation Zones
Population Density Economic Activity

What map would I use if...

...I wanted to find the best location for a new farm.
